

QUALITY POLICY STATEMENT (BS EN ISO 9001)

It is the stated policy of Euro Quality Coatings Ltd., to provide powder coating services that exceed our customers' expectations. For example, by reducing reject rate and improving throughput for our customers'

EQC will fully comply with the legislation related to its processes and operations

We are continually seeking continuous improvement for the organisation and to exceed our customer' expectations. Through setting quality objectives and other quality activities, which are regularly established and reviewed during management review meetings.

We post this policy statement and quality objectives on company notice boards to ensure the policy and objectives are understood at all levels in the organisation.

We commit ourselves to this policy by having a documented Quality Management System that has been planned and implemented and can demonstrate its efficiency and control in all matters relating to the quality of our electrostatic powder coating services.

Regular internal auditing and management reviews ensure continuing improvement and commitment of the Quality Management System. All are urged to be vigorous in the pursuit of quality.

Management Quality Representative

I have appointed a Quality Manager, as nominated representative to execute, co-ordinate and supervise the Quality Management System. The Quality Manager is the prime signatory to Quality Management System documents and has authority to prevent despatch of non-conforming items. In the Quality Manager absence, Quality personnel will deputise for quality matters.

Continuing investment to update our plant, equipment and people enables us to maintain the high standards for which we are known.

We welcome customers' representatives to our premises where all quality documents and software are available for the purpose of quality surveillance and inspection.

The Quality Management System is aimed at supporting the above policies and is structured to meet the requirements of BS EN ISO 9001
