WHY QUALICOAT WITH EQC

QUALICOAT
Inspired by architecture, trusted by professionals

EQC
EURO QUALITY COATINGS

Choosing **EQC** as your **QUALICOAT** approved applicator ensures that your powder coating project is executed with the highest level of quality, expertise, and environmental responsibility, ultimately leading to a more durable and reliable finish for your products or structures.

QUALICOAT defines comprehensive quality requirements and monitors compliance by licensed plants worldwide. Assurance that EQC provides a premium-grade product delivering long-term value and consistent quality. Further EQC Quality Certificates include ISO 14001:2015 and ISO 9001:2015.

If that isn't enough...

Here are 10 Reasons to choose EQC as your QUALICOAT applicator:

1 Quality Assurance:

QUALICOAT approval signifies a commitment to maintaining the highest quality standards in powder coating application, ensuring consistent and reliable results.

2 Expertise and Training:

EQC, as your QUALICOAT approved applicator, undergo rigorous training and certification processes, equipping us with the knowledge and skills to handle complex coating projects effectively.

3 Product Compatibility:

EQC are well-versed in selecting the right coatings and processes for specific substrates and applications, preventing compatibility issues and ensuring longevity.

4 Environmental Responsibility:

QUALICOAT promotes eco-friendly practices, and as approved applicators EQC adhere to stringent environmental standards, minimising waste and emissions during the coating process.

5 Durability and Longevity:

Coatings, applied by EQC as a QUALICOAT approved applicator, are known for their durability, resistance to corrosion, UV stability, and long-lasting appearance, ensuring a cost saving in the lifetime of the finished product.

6 Warranty Compliance:

Many coating manufacturers require the use of QUALICOAT approved applicators to maintain their product warranties, giving you peace of mind regarding the longevity of your coating system.

7 Consistent Colour Matching:

EQC have the expertise to ensure precise colour matching, providing a cohesive finish across all coated components, even for large projects.

8 Regulatory Compliance:

EQC's QUALICOAT approval ensures compliance with local and international regulations and standards related to coating materials and application methods.

9 Industry Reputation:

EQC, as a QUALICOAT approved applicator, enhances your project's reputation and credibility, as it demonstrates a commitment to quality and professionalism.

10 Technical Support:

When you work with EQC, you gain access to our technical expertise and support, which can be invaluable in addressing any coating-related challenges or questions that may arise.

Euro Quality Coatings (EQC) is proud to hold the QUALICOAT accreditation.

Automatic powder coating facility

The fully automatic powder coating facility at Euro Quality Coatings is one of the most modern and advanced facilities in the UK.

The powder coating plant is capable of processing a variety of substrates including:

- **Aluminium**
- **Steel**
- **galvanised steel**
- **E-coated steel and non-ferrous castings.**

The facility includes an in-line spray pre-treatment plant offering Chrome Free Oxylan pre-treatment.

Powder application

Powder application is by means of automatic reciprocating powder spray guns with additional facilities to perform manual touch in operations before and after the spray booth. The combination of automatic spray alongside a manual spray capability enables us to provide the best possible coverage of sheet materials and more intricate components.

Powder cure

Powder curing is by means of a gas fired convection oven which is maintained to the highest standard to ensure proper cure of the applied powder coating. Daily temperature profiling of the powder curing oven is carried out to ensure reliability of this equipment.

Inspection and packing

End of line inspection and packing is carried out by trained staff. Each job is inspected and packed to individual customer specifications where requested.
